Reference Letter

We would like to confirm that our staff participated in a training course led by coach Michał Sajdak from Securitum on April 11-13, 2016.

The topic of the training was **"Security of www applications – advanced edition"**. It has been fine-tuned to our needs and the nature of work of our IT specialists. The training was appreciated by the participants mainly for: high quality training materials, a large number of practical exercises, interesting real-life examples based on the practice of the coach, good organization and opportunities of active discussion during the training as well.

We wish to thank for the professional conduct of this training, at the same time strongly recommending participation in workshops on IT security organized by Securitum.
